Endo Code M
New Zealand Organic Glandular Sarcodes
Concentrated Homeopathic Tincture 60 mL  NDC 54118-7987-2

Organotherapy

Traditional Keynotes:
- Male Hormonal Support
- Helps Restore Sexual Energy
- Prostate

Complementary Remedies:
- Maca Intrinsic
- Licro Intrinsic
- Adrenal Life Force
- Juniper Intrinsic
- Adreno/ADR Code
- Adrenal Millieu
- BioHealth Matrix
- Hypothal Code
- Borage Intrinsic
- MetaChlor
- LIFE Force
- Vitamin B5

Posology: 30 drops, 2x daily

Male Hormonal Balancer

In Greek, the term ‘Sarcode’ means fleshy. Sarcodes imply protoplasm of animals, as distinguished from vegetable protoplasm. In homeopathy, some of the Sarcodes are proved medicines. They are obtained from healthy endocrine or ductless glands, or from normal secretions of living human organs and lower animals. The secretions are mostly hormones. As such, they are gainfully employed as homeopathic support and correction of the indicated substance through the provision of the correct oscillatory signature of what a healthy, well functioning gland or secretion should be. A strategic blend of X and C potencies are present in the 60 mL cobalt blue bottle (protects the remedy) for this purpose, as are accompanying “classical homeopathic” remedies.

Note the addition of flower essences in some remedies, appropriate to the targeted gland, organ or system.

The idea of organotherapy was first introduced by Constantine Hering, M.D., the father of American Homeopathy, in 1834. This research has been continued now by prominent European, North and South American physicians and practitioners.

There are three proposed ways in which organotherapy is believed to work:

1. It has a direct effect on stimulating the function of the organ by enhancing the selection of enzymes and specific nucleic acids lacking in the organ.
2. The administration of the homeopathic preparation of organ tissue overwhelms the body with organ antigen, in effect stopping the production of anti-organ antibodies.
3. The organotherapy remedy may provide antigen to substitute for damaged tissue antigen.

We use low potentized botanicals, tissue salts and 6C sarcodes, which are at the perfect homeopathic balance point between encouragement and regulation. (Typically 4C and 5C homeopathic potencies are used for stimulatory effects; 7C is used for regulating the organ or tissue 9C as inhibitory).

Attempting to detoxify a weak or low functioning organ without first providing repair and nourishment will have detrimental effects, both physically and energetically, and may, in fact, push the organ deeper into failure.

Hormones can be proteins, polypeptides, amino acids, or steroids. The most well known hormones are the sex steroids: Estrogen is produced in the ovaries and testosterone in produced in the testes. Estrogen and testosterone are also produced in the adrenal glands of both sexes. Other hormones include thyroxin, produced by the thyroid, insulin, produced by the pancreas and adrenalin produced by the adrenals and so on and so forth. The pituitary and hypothalamus in the brain release a variety of hormones that affect other organs, including the sex glands.

Through the blood, hormones interact with cells by binding to special proteins called receptors. The binding is specific, like a key in a lock. When enough binding sites are occupied, a message is passed on to the target cell nucleus, unmasking genetic information and resulting in physiological reactions ultimately responsible for stimulating or regulating proper metabolism, development, growth, reproduction and behaviour. Hormones are released into the blood in very small amounts. Their levels are controlled by the rate of release and the rate of degradation, usually by the liver or kidneys. Timing of hormone release is critical for normal function. This is especially true during fetal development. Precise hormone control is important, as too much or too little at the wrong time can result in dysfunction or injury to the complex tissue antigens.

The complexity of the endocrine system and its hormonal messengers provides practitioners with a multitude of challenges when imbalances present themselves. The rapidly increasing array of xenobiotic influences are central to endocrine and hormone disruption. These, and many other factors, contribute to overwhelming stress on the body. Hormones are the result of homeostatic regulation, and imbalances can lead to dysfunction.

Many practitioners are reporting that Endo Code M is an excellent carrier of hormonal imprints & inversions that can be created by instruments such as the Mora or WaveFront 3000 (VeraDyne) and EAV instruments. eg: Testosterone 6X-12X-60X-100X.

Endo Code M is also effective as a stand alone remedy, without imprints or inversions, in solid support of the male endocrine and hormonal systems.

Ingredients:
- Adrenal 3X, 6X, 12X, 2X
- Aralia quinquefolia 3X
- ATP 5X, 8X, 30X
- Cadmium metallicum 6X
- Hypothalamus 3X, 6X, 12X, 6C
- Juniperus communis 3X
- Lycopodium clavatum 3X
- Mercurius corrosivus 12X
- Orich 6X, 6C
- Petroseolinum sativum 3X
- Pituitary 3X, 6X, 12X, 6C
- Populus tremulioides 1X
- Pulsatilla nigricans 3X
- Quercetin 6X, 12X, 30X, 12C, 30C
- Sabal serrulata 1X
- Thyroid 3X, 6X, 12X, 6C
- Urtica dioica 3X
- Xanthoxylum fraxineum 3X
- Gorse 30C
- Holly 30C
- Larch 30C
- Walnut 30C
- Minimus 30C
- Rock water 30C
- Wild oat 30C

The commentary is not meant to diagnose, treat or replace conventional treatment, and has not been approved or reviewed by the FDA, Health Canada, BMS, European Union Health Commission, South and Central American regulation agencies etc. It is the sole responsibility of the licensed or certified practitioner to determine if the information is accurate and appropriate to their practice.
Materia Medica

Adrenal (Sarcode) 3X, 6X, 12X, 6C - Adrenal glands are chiefly responsible for regulating the stress response through the synthesis of corticosteroids and catecholamines, including cortisol and adrenaline.

Aralia quinquefolia (Panax Ginseng) 3X - The root is alterative, diaphoretic, diuretic, pectoral and stimulant. The herb encourages sweating, is stimulating and detoxifying and is used internally in the treatment of pulmonary diseases, asthma, rheumatism, etc. Because of its plant compounds it is used for hormonal balancing and restoring sexual excitement and energy.

ATP (Sarcode) 5X, 8X, 30C - Adenosine-5'-triphosphate (ATP) is a multifunctional nucleotide and is most important in cell biology as a coenzyme that is the "molecular unit of currency" of intracellular energy transfer. In this role, ATP transports chemical energy within cells for metabolism.

Cadmium metallicum (Cadmium) 6X - It is used for fever, detoxification of heavy metals, specifically cadmium which is antagonistic to the prostate. Cadmium is found in tobacco smoke, root canal material, burned rubber etc.

Hypothalamus (Sarcode) 3X, 6X, 12X, 6C - One of the most important functions of the hypothalamus is to link the nervous system to the endocrine system via the pituitary gland (hypophysis). It is responsible for certain metabolic processes and other activities of the Autonomic Nervous System.

Juniperus communis (Juniper) 3X - It is a useful remedy for gastric conditions resulting from an underproduction of hydrochloric acid and is also of benefit in gastrointestinal infections, inflammations and cramps. The bitter action aids digestion and relieves flatulent colic. Junipers is often used in the treatment of rheumatism, Arthritis and gout, and other arthritic conditions associated with the accumulation of acid waste. Here, it promotes the excretion of uric acid at the kidney.

Lycopodium clavatum (Club Moss) 3X - Club moss is an effective diuretic that eases many conditions associated with suppressed urine, including the flushing of stones and gravel from the kidneys and gallbladder, accumulation of fluids in the tissues that produce swelling (edema), bladder irritation, cystitis, gout and rheumatoid Arthritis.

Mercurius corrosivus (Corrosive sublimate) 12X - Mercurius corrosivus is used for sore throats; red, swollen, painful, burning pain; pain may extend to ears, urinary tract, prostate. Also for photophobia; loose teeth; gonorrhea, as well as other conditions. Better - rest. Worse - swallowing; night, cold.

Orchis (Sarcode) 6X, 6C - Bovine orchic tissue to provide sarcode targeted support for the testes.

Petroselinum sativum (Parsley) 3X - Parsley root has been used medicinally since ancient times for digestive disorders, bronchitis and urinary tract problems. It is used today to help regulate blood sugar and menstrual cycles.

Pituitary (Sarcode) 3X, 6X, 12X, 6C - The pituitary gland produces hormones to control growth, blood pressure, pregnancy, breast milk production, sexual organ functions, thyroid gland and metabolism.

Populus tremuloides (American Aspen) 1X - The bark of populous contains salicin, which is similar to aspirin. It is anti-inflammatory and an analgesic and is used to reduce fevers.

Prostate (Sarcode) 6X, 6C - Bovine prostate tissue supplies prostate phosphatase. Phosphatase has been found to improve the quality of seminal fluid. Recommended for many conditions such as nocturia, dribbling, loss of libido and other aging processes.

Pulsatilla nigricans (Pasque/Wind Flower) 12X - Pulsatilla extends its effectiveness on stomach and bowels, female genital organs, blood vessels, mucous membranes, skin, lungs, eyes, etc. It is one of the most frequently used medicines for complaints of recurrent styes and chalazion, asthma, urticaria, lichen planus, Vitiligo, trigeminal neuralgia, etc. It is one of the best remedies for gynecological and pregnancy related complaints.

Quercetin 6X, 12X, 30X, 12C, 30C - Flavonoids such as quercetin are antioxidants -- they scavenge damaging particles in the body known as free radicals, which damage cell membranes, tamper with DNA and even cause cell death. It reduces symptoms of prostatitis, interstitial cystitis, rheumatoid Arthritis, high cholesterol and heart disease.

Sabal serrulata (Saw Palmetto) 1X - The primary use of saw palmetto is to treat benign prostatic hyperplasia (BPH), a non-cancerous enlargement of the prostate gland. It is also used to treat urinary tract problems in men and even to boost libido.

Thyroid (Sarcode) 3X, 6X, 12X, 6C - The thyroid is controlled by the hypothalamus and pituitary. The gland gets its name from the Greek word for "shield", after the shape of the related thyroid cartilage. It produces thyroid hormones such as TSH which controls the sex hormones estrogen and testosterone and acts to support healthy thyroid tissue and function.

Urtica dioica (Stinging Nettle) 3X - It is used for excessive rheumatic complaints and inflammatory conditions (especially for the lower urinary tract and prostate), menstrual bleeding, diarrhea, diabetes, urinary disorders and respiratory problems including allergies. Recommended as a diuretic, for relief of benign prostatic hyperplasia (BPH) and other prostate problems.

Xanthoxylum fraxineum (Prickly Ash Bark) 3X - Any sign of poor circulation is thought to benefit from the use of this herb, including chilblains, leg cramps, varicose veins and varicose ulcers. Prickly ash bark has been used to relieve many chronic problems, such as rheumatism and skin diseases. It has a stimulating effect upon the entire body, including the lymphatic system and mucous membranes. It is used for toothaches, pelvic disorders, wounds, back pain and rheumatism.

Flowers

Gorse 30C - Optimism and faith, dissolving hopelessness and resignation.

Holly 30C - Open heart, giving and receiving love rightly, dissolving jealousy/anger.

Larch 30C - Self-confidence, dissolving expectations of failure.

Mimulus 30C - Courage, resolving patterns of shyness.

Vitiligo, trigeminal neuralgia, etc. It is one of the best remedies for gynecological and pregnancy related complaints.

Additional Ingredients:
- Bovine prostate tissue supplies prostate phosphatase. Phosphatase has been found to improve the quality of seminal fluid. Recommended for many conditions such as nocturia, dribbling, loss of libido and other aging processes.
- Pulsatilla nigricans (Pasque/Wind Flower) 12X - Pulsatilla extends its effectiveness on stomach and bowels, female genital organs, blood vessels, mucous membranes, skin, lungs, eyes, etc. It is one of the most frequently used medicines for complaints of recurrent styes and chalazion, asthma, urticaria, lichen planus, Vitiligo, trigeminal neuralgia, etc. It is one of the best remedies for gynecological and pregnancy related complaints.
- Quercetin 6X, 12X, 30X, 12C, 30C - Flavonoids such as quercetin are antioxidants -- they scavenge damaging particles in the body known as free radicals, which damage cell membranes, tamper with DNA and even cause cell death. It reduces symptoms of prostatitis, interstitial cystitis, rheumatoid Arthritis, high cholesterol and heart disease.
- Sabal serrulata (Saw Palmetto) 1X - The primary use of saw palmetto is to treat benign prostatic hyperplasia (BPH), a non-cancerous enlargement of the prostate gland. It is also used to treat urinary tract problems in men and even to boost libido.
- Thyroid (Sarcode) 3X, 6X, 12X, 6C - The thyroid is controlled by the hypothalamus and pituitary. The gland gets its name from the Greek word for "shield", after the shape of the related thyroid cartilage. It produces thyroid hormones such as TSH which controls the sex hormones estrogen and testosterone and acts to support healthy thyroid tissue and function.
- Urtica dioica (Stinging Nettle) 3X - It is used for excessive rheumatic complaints and inflammatory conditions (especially for the lower urinary tract and prostate), menstrual bleeding, diarrhea, diabetes, urinary disorders and respiratory problems including allergies. Recommended as a diuretic, for relief of benign prostatic hyperplasia (BPH) and other prostate problems.
- Xanthoxylum fraxineum (Prickly Ash Bark) 3X - Any sign of poor circulation is thought to benefit from the use of this herb, including chilblains, leg cramps, varicose veins and varicose ulcers. Prickly ash bark has been used to relieve many chronic problems, such as rheumatism and skin diseases. It has a stimulating effect upon the entire body, including the lymphatic system and mucous membranes. It is used for toothaches, pelvic disorders, wounds, back pain and rheumatism.
