**Detoxifier Homaccord Tincture**

**Traditional Keynotes:**
- Irritable Bowel Syndrome
- Crohn’s
- Passive Leaky Gut
- Dysbiosis
- Mycoplasmas
- Collitis
- Helicobacter Pylori
- Gastric Inflammation
- Chronic Fatigue Syndrome

**Complementary Remedies:**
- Adrenal Life Force
- Flora Syntropy / GALT Fortifier
- Hypothal Code
- Can-Tox
- Allium Ursinum
- HepaGest Powder
- MetaChlor
- CLN-Tox
- Myco-Tox
- Ameoba-Tox / Para-Tox
- INF-Tox / Inflamma Life Force
- Artemisia Intrinsic
- Berberine Intrinsic
- Condurango Intrinsic
- Lapacho Intrinsic
- Mycelia Intrinsic / Olive Leaf Intrinsic

**Posology:** 30 drops, 2x per day

---

**IBD-Tox**

**Concentrated Homeopathic Medicine**

**60 mL**  NDC 54118-7994-2

---

**Detoxifier Homaccord Tincture**

The Homeopathic Pharmacopoeia Convention of the United States defines detoxifier homaccords as "homeopathic attenuations of: pathological organs or tissues; causative agents such as bacteria, fungi, ova, parasites, virus particles, and yeast; disease products; excretions or secretions." Isopathic remedies share a close relationship with detoxifier homaccords, however, they emphasize substances taken and potentized from the patient's surround such as environmental toxins, metals, imponderables, etc. Detoxifiers presented in this section are a combination of classical homeopathic preparations in a 60 mL cobalt blue bottle (protects the remedy) which may include detoxifier homaccords isodes, sarcodes and potentized botanicals all designed to differentiate, constellate and amplify the keynote focus of the remedy. All ingredients are made from mother tinctures, hand diluted as per Hahnemann and hand succussed. Many are in multiple potencies known as homaccords to provide for the processes and patterns of homeopathic ascendency. Potentized Mesenchyme 6X, 9X, 6C and ATP 5X are included to assist in homeopathic ECM drainage and homeopathic empowerment.

---

**Irritable Bowel Detoxification**

Irritable Bowel Dysfunction (IBD) is a group of chronic inflammatory disorders affecting the large and small intestine. The major forms of IBD include Crohn’s disease and ulcerative colitis. The main difference between these two forms of IBD are the location and nature of the inflammation. Crohn’s disease can affect any portion of the digestive tract, from the mouth to the anus (although many cases begin in the ileum of the small intestine) and affects the entire bowel wall. In contrast, ulcerative colitis is confined to the colon and rectum and affects mainly the intestinal mucosa. Symptoms of IBD include abdominal pain, cramping, diarrhea, bloody stools, vomiting, nausea and weight loss.

**Hormonal changes may trigger IBD symptoms (80% of IBD patients are women).**

Studies show that IBD is often associated with autoimmune and chronic inflammatory conditions. Arthritis, asthma, multiple sclerosis, type 1 Diabetes and psoriasis are all seen with greater incidence in patients with IBD. IBD may be a causative factor in the development of uveitis, a condition involving chronic inflammation in the eye and sarcoidosis, a chronic disease marked by the formation of inflammatory nodules throughout the body, most commonly in the lung, liver and lymph glands.

**IBD-Tox** is a powerful homeopathic detoxifier homaccord specifically designed to address the most common causative factors related to Irritable Bowel Dysfunction. Multiple homaccords include amoeba, bacillium, penicillin, Aspergillus flavus, Aspergillus niger, Brucella canis and Mycobacterium T-para. Sarcodes provide the blueprint of healthy tissue/secretions and assist in the repair of damaged intestinal mucosa.

**Titanium oxide, a preservative found in cake and bread mixes is an irritant often found in Crohn’s and Ulcerative Colitis.**

**Mycotoxins found in molds and fungi are often the cause of “sick house syndromes” and may be an exacerbating if not central factor.**

**The complex blend of detoxifier homaccords, inflammations of the lung and lymphatic system, food allergies (85% of all Americans have gluten sensitivity), skin disorders, immune system disorders, diabetes, gallstones and depression.**

**TIP:** Sequential imprinting (WaveFront 3000) IBD-Tox with appropriate energetic pathogens, eg. mycoplasmas, parasites, mycotoxins, etc. in combination with GALTFortifier, Flora Syntropy, Berberine Intrinsic, CataZyme-U and Mycelia Intrinsic may be helpful.

**Ingredients:**
- Amoeba 30X, 60X, 200X
- Aspergillus Flavus 4C
- Aspergillus Niger 3C
- ATP 5X
- Bacillium 12X, 30X, 60X
- Brucella Canis 2C
- Intestinal mucosa 6X, 12X, 30X
- Mesenchyme 6X, 9X, 6C
- Mycobacterium T-para 2C
- Penicillus 12X, 30X, 60X

**Amoeba 30X, 60X, 200X** - Contains a variety of amoeba detoxifier homaccords providing a specific representation of the energetic bandwidth of water borne parasites affecting the gastrointestinal tract. They alert the body to various amoeba parasitic strains, resulting in deep cellular elimination.

**Aspergillus Flavus (Fungus) 4C** - It is a common mold in the environment and is a human pathogen, associated with aspergillosis of the lungs and sometimes causing corneal, otomycotic and nasoorbital infections. Many strains produce significant quantities of aflatoxin, a carcinogenic and acutely toxic compound. A. flavus spores are allergenic.

**Aspergillus Niger (Fungus) 3C** - It may cause black mold on certain fruits and vegetables such as grapes, onions and peanuts and is a common contaminant of food. It has been known to produce potent mycotoxins called ochratoxins.

**ATP (Sarcode) 5X** - Adenosine-5’-triphosphate (ATP) is a multifunctional nucleotide and is most important in cell biology as a coenzyme that is the “molecular unit of currency” of intracellular energy transfer. In this role, ATP transports chemical energy within cells for metabolism.

**Bacillus subtilis 12X, 30X, 60X** - Contains a variety of bacillus detoxifier homaccords isolated from tissue of a tuberculous lung cavity to provide a specific representation of the energetic bandwidth of bacilli pathogens. They alert the body to various bacillus strains, resulting in deep cellular elimination.

**Brucella Canis (Canine Fetus) 2C** - In descending order, these pathogens tend to be found in most IBD cases and Brucella leads the list! (Brucella, Coxsackie Virus, Toxoplasmosis, Campylobacter, Streptococcus, Salmonella, Amoebae, Staphylococcus, Giardia Lamblia and Ascaris). In humans, brucellosis causes a range of symptoms from mild flu-like illness, to severe infections of the central nervous systems and lining of the heart.

**Intestinal mucosa (Sarcode) 6X, 12X, 30X** - The mucosa is the innermost layer of the gastrointestinal tract that is surrounding the lumen, or space within the tube. This layer comes in direct contact with the food and is responsible for absorption and secretion, important processes in digestion. The mucosa is divided into three, epithelium, lamina propria and muscularis mucosae. The mucosa is highly specialized in each organ of the gastrointestinal tract, facing a low pH in the stomach, absorbing a multitude of different substances in the small intestine and also absorbing specific quantities of water in the large intestine.

**Mesenchyme (Sarcode) 6X, 9X, 6C** - Mesenchyme is a type of loose connective tissue, of mesodermal origin and located within the embryonic mesoderm, consisting of a ground substance matrix containing a loose aggregate of unspecialized cells which are capable of developing into connective tissue, bone, cartilage, the lymphatic system and the circulatory system. The organotherapeutic sarcode focalizes appropriate drainage and alleviates biotoxic overloading.

**Mycobacterium T-para 2C** - Bacterial detoxifier homaccord. This organism has been clinically found/cultured in the intestines of patients suffering from Crohn's.

**Penicillium (Penicillin) 12X, 30X, 60X** - Penicillin is a group of antibiotics derived from Penicillium fungi. They are Beta-lactam antibiotics used in the treatment of bacterial infections caused by susceptible, usually Gram-positive, organisms and are often the cause of mycotoxin infection in immune compromised individuals.

**Additional Ingredients:**
- Reverse osmosis water 68%
- Ethanol 12%
- Kosher glycerine from palm/or coconut oil 20%
