BioEnergetic practitioners of all approaches agree: every step in the processes of detoxification must address potentially recurring lymphatic congestion if “obstacles to cure” are to be clarified.

A dramatic increase in poly-systemic conditions are being presented today, due to the rise in environmental toxicity, compromised food and water supplies, and poor genetic building material.

Merely recommending a general lymphatic drainage remedy no longer carries the restorative authority it once did. In fact, suggesting a generalized lymphatic drainage remedy can often yield a suppressive therapeutic result, which is the antithesis of what practitioners are seeking to accomplish.

Each of the three Lymph BioToxicosis remedies, given at the correct time in the sequential cycles of restorative healing, will 1) substantially reduce the challenging effects of xenobiotic translocation and reabsorption, and 2) significantly soften and often eliminate many of the symptoms of regressive retracling.

The body is a flow system. BioEnergetically speaking, all disease reactions (symptoms) are biologically goal oriented and thus may serve in the detoxification of the system and in the repair of toxin-caused damage. In other words, symptoms are healing strategies generated by the Vital Force in an attempt to either bring about resolution, or to prioritize cascading detoxification of the offending xenobiotic at levels where it can be clarified.

Each of the Lymph BioToxicosis remedies is synergistically compatible with all botanicals, homeopathics and nutrionals, or can be used as a stand alone remedy. They are designed to provide biotoxicological clarification at the appropriate level to ensure well tolerated and clinically-specific lymphatic drainage. The addition of Mesenchyme 9X and Fumaria officinalis 6X combine to alleviate biotoxic overloading.

Expanded applications beyond causal chain detoxification may include: ionic footbaths, laser treatment, lymphatic massage and Bowen treatments, colonic therapies, chiropractic adjustments, acupuncture, mesotherapy, infrared sauna sessions, pre-post surgery, chelation support, etc.

Lymph 1 Acute was designed to assist in the clarification process at the Extra Cellular Stage of drainage. A blend of low potentized, Spagyrically processed herbs provide nutrition, while correcting sarcodes supply the body with the blueprint of healthy tissue. Specific homeopathic polychrones and cell salts are also included to assist in the clarification process at this level or phase. A cobalt blue bottle protects the remedy.
